BIG CONCEPT

QUARRY OWNERS
& PROCESSORS

100%

EXPORT ORIENTED
COMPANY

QUARRY ADVANTAGES

We recommend stone usage to enhance aesthetic appeal and cost-effectiveness. Sourcing from our exclusive quarries provides numerous advantages:

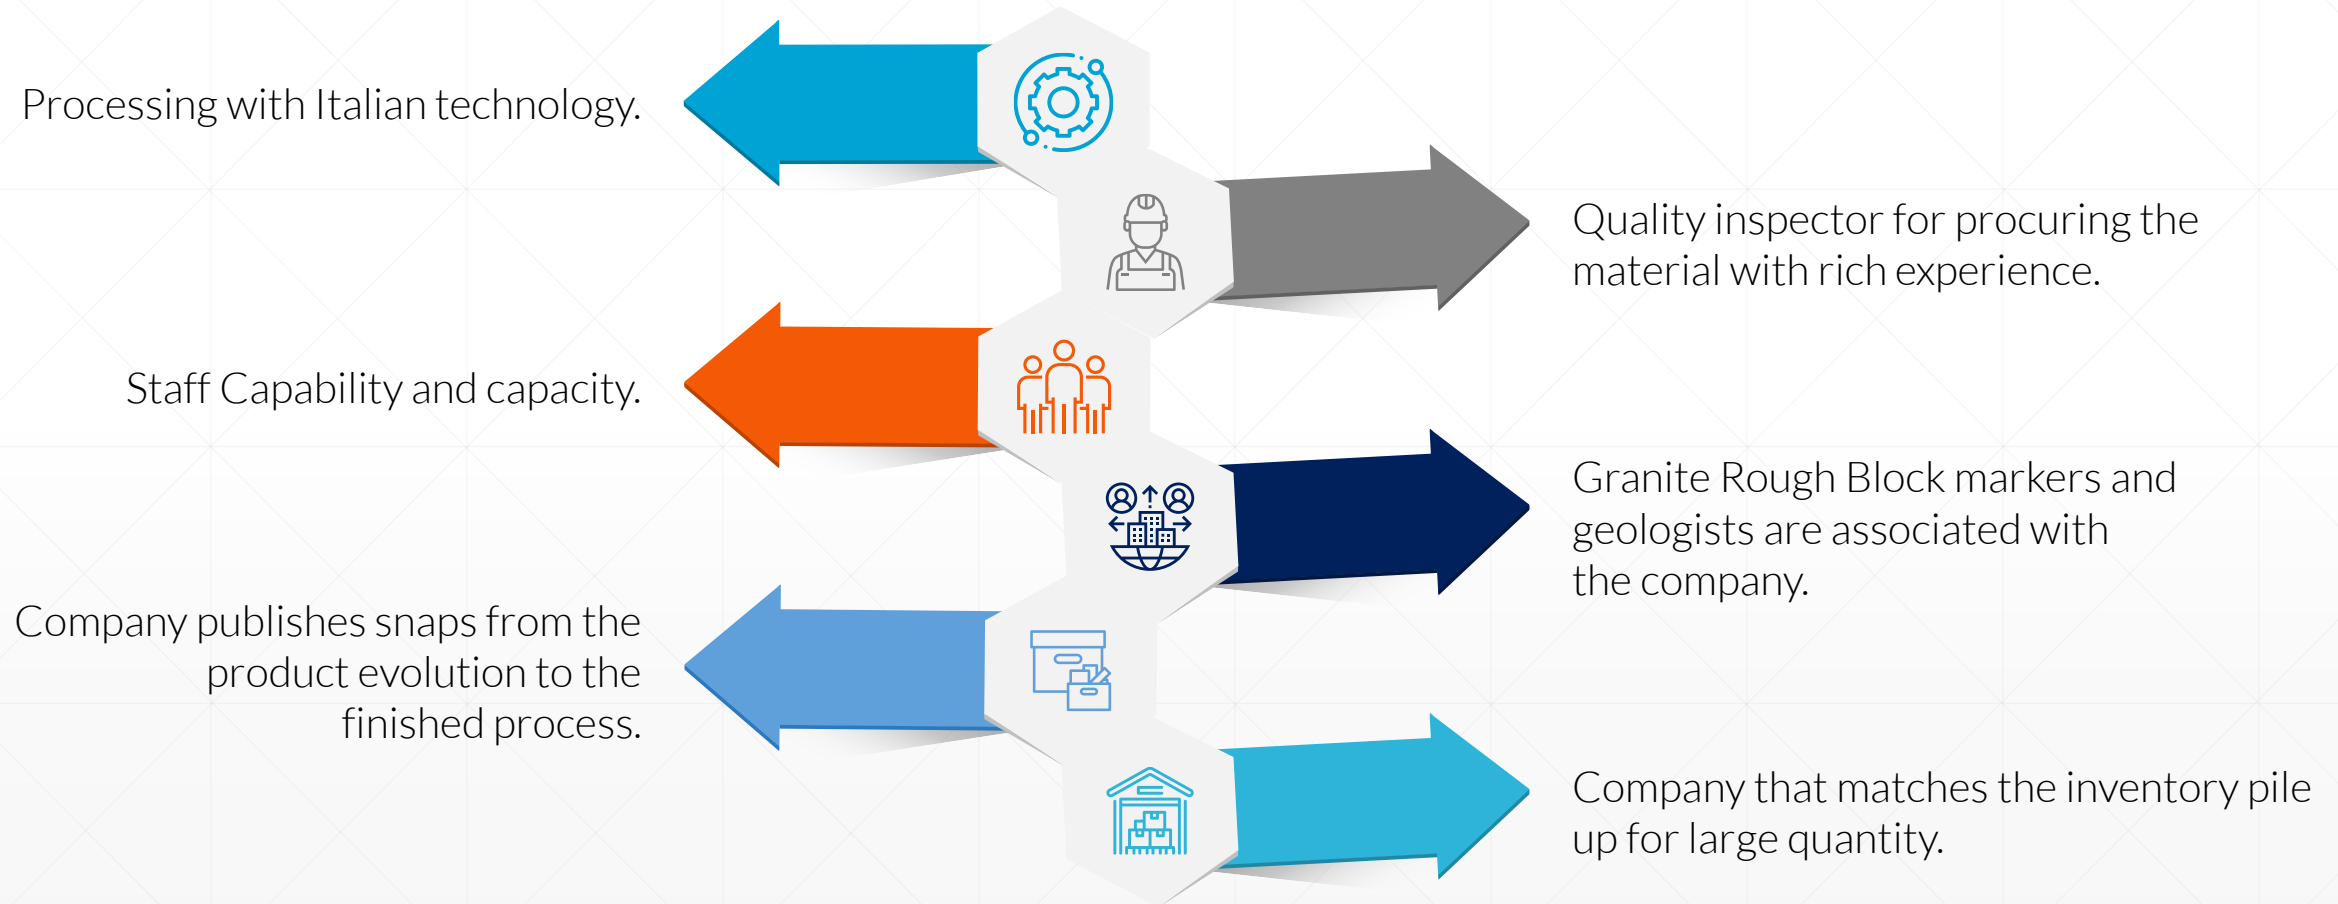

- We safeguard customer property at a professional level before it leaves the destination.
- Customers can plan their large projects better with regular consumption of exact slabs.
- Get blocks, semi-finished and finished products based on specific requirements of the project.
- Expert guidance is provided for choosing color combinations and contrasts.
- Our technical team supports your decision-making.
- Being quarry owners, our team can also procure blocks from other quarries to meet our customer needs.

WHAT WE DO

The company possesses in-house service that consists of intricate operational methodologies.

PRODUCT PORTFOLIO

Sandstones

Due to its chemistry and properties the brown granite is common in South India. It has a chromatic palette which is ideal for decorative purposes. The coffee brown shades are found in South Indian quarries. It is a resourceful rock which can be manipulated to suit domestic and commercial purposes. It is known to amplify the beauty of any application in form and decoration due to the visible grains. Other shades like white, grey and pink are also utilized for several applications. Its processing involves dressing, cutting surface grinding, polishing, cutting edges and trimming.

WHAT WE OFFER

We pride ourselves with quick delivery!

Enhance your product portfolio by using a variety of natural stones.

You can expect everything from top to bottom in our association to be top-notch for your business.

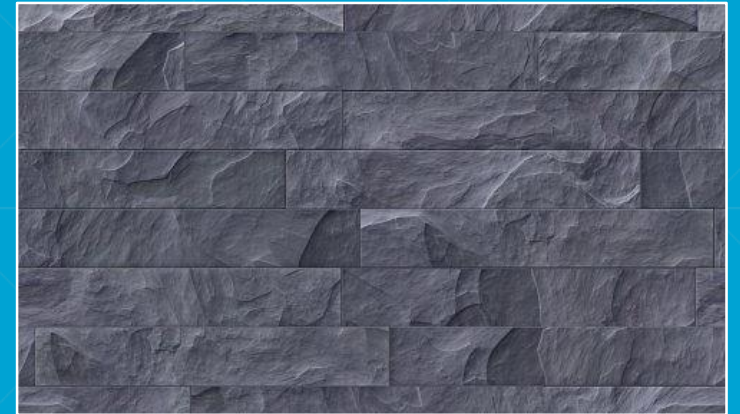

By knowing more business partners, you can make more profit. With our new products and range, the sales will grow steadily.

Our **25+ years** of experience in this business will be more resourceful to you than any product in the market.

From stones to advice on every stone, you will get everything from us.

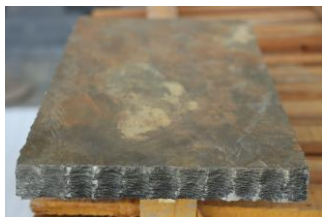

Slate

If you are looking for a very attractive and stylish finish, then it has to be slate. Normally, Earthen tones in color, they are very identifiable from any other natural stone available in India. This is a metamorphic stone. It is characteristic of a grainy quality and is a fossilized sedimentary rock. It is extremely versatile and come as slabs from our factories. They are made into sheets for various applications. It is formed through clay mud, organic matter and also decomposed stone. Heat and pressure harden it and make it durable. It appears in black green or mottled shades. Some types of slates can be tumbled or honed.

Limestone

This is a sedimentary rock which is found in the earth's ecosystem. Its primary characteristic is a chemical compound called calcium carbonate (CaCO_3). It is a calcite and is known as a type of mineral. It also contains feldspar, siderite, quartz, clay minerals and pyrite. When we mention limestone the first thing comes to mind is construction. There are so many types of this natural stone available in India and are characterized by the rock formation. So we have chalk, travertine, lithographic limestone, tufa and coquina. This natural stone is also made from some fragments of marine organisms like molluscs, coral and foraminifera. Did you know that the famous Giza Pyramids of Egypt are made from limestone?

Sandstone

The profile of the Indian sandstone stands out due to the veining and appearance. Every region displays a different characteristic. In its organic avatar it is sedimentary and contains minerals and grains. It is known for binding cementing materials. This natural stone also contains clay sized particles and silt forming a matrix. It is mostly found by the river basins. Sandstone stands out for its properties. Hence, its applications are also distinctive.

Monuments

A **PICTURE** IS WORTH A THOUSAND WORDS

A complex design shall be
Tabulated to simple prototype and
create a very accurate product by
our in house team.

WE EXPORT TO MORE THAN **25 COUNTRIES** WORLD-WIDE

10,124 Containers

Whoa!
*That's a big
number, aren't
you proud?*
